SERVICES & SOLUTIONS

Buildicy Services & Solutions Guide

A client-friendly map of the capabilities represented across Buildicy's real project portfolio.

AI • AUTOMATION • SOFTWARE • DIGITAL PRODUCTS

Prepared for prospective Buildicy clients.

From business bottleneck to digital system

Our portfolio spans growth, AI, automation, software, mobile, fintech and blockchain. The common thread is building systems around a real use case.

> **“We do not start with a technology label. We start with the workflow, the user and the business problem.”**

Our service universe

AI & Business Intelligence

AI-powered assistance, insights, customer intelligence and business workflows.

Marketing & Lead Systems

Lead generation, qualification, landing-page conversion workflows, campaign management and follow-up.

CRM & Customer Operations

Customer data, sales pipelines, interaction tracking, dashboards and automated follow-ups.

Business Automation

Process automation, workflow orchestration, API integrations, reporting and operational dashboards.

Web & SaaS Product Development

React/Next.js applications, SaaS products, business platforms and custom software.

Mobile Product Development

Mobile-first experiences, booking workflows, payments, communication and administration.

FinTech & Payment Infrastructure

Multi-currency wallets, stablecoin flows, KYC, banking infrastructure, provider abstraction and settlement.

Blockchain & Web3

Identity, credentials, voting, tokenization, ownership records, digital assets and on-chain verification.

Data Engineering & Automation

Data processing, transformation, validation, reporting and structured data workflows.

Technology & Community Platforms

Hackathon management, participant registration, challenges, collaboration, submissions and showcases.

Where our projects fit

Attract → Engage → Operate → Transact → Verify
